

Emiliano Acevedo

Junior Front-end Developer

I am passionate programming student who loves to learn new things, so I usually study on my own and constantly develop personal projects. I am looking to enter the technology industry as an intern or working part-time creating applications and websites, allowing me to gain professional experience as a software developer.

Platzi

PERSONAL PROJECTS

Website Portfolio (08/2022 - Presente)

- My website made with Bootstrap, where my most recent projects are along with my skills, so its content will be updated constantly. It allowed me to strengthen my layout skills and learn about the capabilities of Bootstrap.

Yard Sale E-commerce (06/2022 - 06/2022)

- Interactive webpage of an E-commerce, made with HTML, CSS and JavaScript. It helped me to understand and practice Responsive Design and DOM manipulation.

Painting Souls (04/2022 - 05/2022)

- As the final project for the Fundamentals of Videogame Development course, I developed a videogame in Unity as a team. It was a very good experience of teamwork, but above all of working under pressure, since we learned Unity and developed the game in 1 month.
